Dear Recruiting Officer,

Learning about the Maui School District has given me a great degree of enthusiasm to become part of the team. In addition to my formal education (Education Doctorate Degree in Organization and Leadership and a Master of Education with Emphasis in Technology both from the University of San Francisco respectively), I possess 15+ years of experience in teaching with standards-driven, innovative project based lessons and education program development. I believe these practical experiences will make me a valuable asset to the district.

I am determined and ready to work for **you** because I share the same ideology and vision regarding exceptional teaching and learning excellence, while trying new skills and gaining achievements along the way. Currently a STEAM Teacher in the Del Mar Union School District which combined with my past years of teaching experience has aided in developing a teaching and learning focused demeanor, target-driven mindset with the flexibility to take on tasks and challenging teaching duties which demonstrates my professional technical skills.

I whole-heartedly believe that every individual is entitled to an enriching education, respect, and professionalism. My goal is to encourage learning minds in develop their inner strengths and abilities, with the activities that truly inspire them.

I am able to provide a stimulating learning environment that fosters confidence and encourages individuals to reach their potential and demonstrate growth. I take the responsibilities of an educator very seriously and will work hard to develop mutual trust and respect from parents and the administration.

Seeking to take on a challenging position in the Maui School District, therefore, playing a role that will enable the use of my teaching and mentoring skills and long-term educational design and leadership experience to support the growth of the institution at large, and also, meet and exceed expected goals.

Kind Regards,

Janese Swanson
